With regard to independent claims 21, 28, and 39:

one or more results tables **categorized by an associated data type**, each results table comprising a plurality of records;

means for collecting each hit as access information into one such record in at least one results table according to the data type associated with the one such results table, **each of the records in the results table corresponding to a different type of access information** for the data type associated with the results table.

With regard to independent claim 54:

collecting a plurality of hits **including access information**;

storing the analysis results in a **container file** comprising one or more results **tables differentiated by one or more data types**.

With regard to independent claim 55:

collecting a plurality of hits **including access information**;

storing the analysis results in a **container file** comprising one or more results **tables differentiated by one or more data types** by creating records in the one or more results tables.

2. These limitations, in conjunction with the other limitations in the independent claims, are not specifically disclosed or remotely suggested in the prior art of record.

A review of claims 21 – 44, 54, and 55, in view of the Examiner's arguments above, indicates that claims 21 – 44, 54, and 55 are allowable over the prior art of record.
